

DIVING MEDICAL STATEMENT

To be read and signed by each participant

Diving in Iceland is an exceptionally beautiful experience. However, it is also a demanding activity that may lead to overexertion and exhaustion. It is important to understand that exposure to near freezing water includes potential hazards. To minimize the risks involved in this activity, we request that every potential participant read and fill out this form carefully. Your safety is our primary concern!

Please be aware that there have been serious incidents involving participants in the medical risk groups identified in this release. A full YES or NO answer must be given to each of the medical conditions listed on the right hand side. Please be aware of the following conditions related to diving in Iceland:

- Participants need to be dry suit specialty diver certified or provide proof that they have done at least 10 dry suit dives in the last two years.
- On some tours, participants must walk in full gear. Including the steel tank, weights, BCD and dry suit the full gear has a weight of about 40 kg.
- In-water duration is usually 35-45 minutes and the water temperature is below 10°C. For this reason, participants should have eaten breakfast or lunch before the activity starts.
- Participants wear a neoprene hood and semi-dry neoprene gloves. This means that the heads and hands are exposed to the water. Part of the face will not be covered by the hood and therefore be in direct contact with the water.
- Participants must be comfortable swimming against a slight current if necessary.
- Whenever entering the water there is a small chance of the suit leaking. Participants should bring a second set of the clothes to be worn under the dry suit (dry underwear/leggings/long sleeve shirt or skiing underwear).
- Participants change in our tour vans in potentially wet, windy and cold weather conditions. In winter, outside temperatures in Iceland may be far below the freezing point.
- Participants should bring adequate thermal protection for the time before and after wearing a dry suit and keep in mind that the weather in Iceland may change within minutes. Participants should be sure to have a hat and gloves along during winter!
- Participants cannot wear most types of jewelry in the water. Participants should leave accessories not needed on tour at their accommodation so that they do not get lost.

I fully understand the content of this form and the information I have provided about my medical history and fitness is accurate to the best of my knowledge. *I accept responsibility for omissions that are a result of my failure to disclose any existing or past medical health condition/s.*

Please answer YES or NO to the following questions about your past and present medical history.

Section 1: Do any of the following apply to you? A YES in this section means that unfortunately we cannot take you on our diving tour. This is for your own safety!

- _____ Any kind of heart disease?
- _____ Heart attack?
- _____ Angina, heart surgery, or blood vessel surgery?
- _____ Inability to perform moderate exercise (walk 1 mile/1.6 km within 12 minutes)? Are you pregnant?
- _____ Any form of lung disease?
- _____ Pneumothorax (collapsed lung), other chest disease or chest surgery?
- _____ Epilepsy, seizures, convulsions or take medications to prevent them?

Section 2: Do any of the following apply to you? A YES in this section means that you need to get medical clearance from a doctor in order to participate in the tour. The required medical is on page two of this document.

- _____ Sinus surgery, ear surgery, hearing loss or problems with balance?
- _____ Currently taking prescription medications? (with the exception of birth control or anti-malarial)
- _____ Untreated umbilical or inguinal hernia?
- _____ Colostomy or ileostomy?
- _____ High blood pressure or taking medication to control blood pressure?
- _____ Diabetes mellitus, even if controlled by diet alone?
- _____ Asthma, or wheezing with breathing or wheezing with exercise?
- _____ Behavioral or mental health problems (panic, fear of closed/open spaces)?
- _____ Back, arm, or leg problems following surgery, injury, or fracture?
- _____ Ulcer or ulcer surgery?
- _____ Bleeding or other blood disorders?
- _____ Recreational drug use or treatment for drug use or alcoholism in the past 5 years?
- _____ Raynaud's syndrome?
- _____ Vertigo/dizziness, blackouts or fainting (full/partial loss of consciousness)?
- _____ Cancer or cancer treatment within the last 5 years?
- _____ Frequent or severe attacks of hayfever or allergy
- _____ Frequent colds, sinusitis or bronchitis?
- _____ Any dive accidents or decompression sickness?
- _____ Recurring complicated migraine headaches or take medications to prevent them?
- _____ Frequent or severe suffering from motion sickness (seasick, carsick, etc)?
- _____ Head injury with loss of consciousness in the last 5 years?
- _____ Age 45 or older AND can answer yes to one or more of the following?
 - Currently smoke a pipe, cigars or cigarettes
 - Have a high cholesterol
 - Have a family history of heart attack or stroke
 - Are currently receiving medical care
- _____ Age 60 or older?

PHYSICIAN APPROVAL

For Diving Tours in Iceland

Participant Name _____

Dear Physician,

The above patient of yours wishes to participate in a diving tour with DIVE.IS in Iceland, but has answered YES to the question _____ in Section 2 on the preceding page. The list of medical conditions on the preceding page is adapted from the standard standard diving [RSTC Medical Statement](#). Your assessment of the individual's fitness for the tour is therefore required.

Please note that there have been serious medical incidents in Iceland involving participants in the risk groups identified in Section 1 and Section 2 on the preceding page.

Diving in Iceland includes the following:

- Participants wear a tight and constricting full body crushed neoprene drysuit. The suit is heavy and may make walking difficult.
- Participants must walk in full gear for certain length to the entry point and later back to where the tour started.
- The suit has seals on the neck and wrists that stop water from getting in. These can be tight and sometimes an additional rubber strap needs to be worn around the neck.
- In-water duration is 30-60 minutes and the water/ sea temperature can be as low as 0° Celsius.
- The heads and hands of participants might be exposed to the cold water through a mitigating material. Part of the face is not be covered by the hood and will therefore be in direct contact with the water.
- There is a slight current in Silfra as well as other dive sites e.g. the ocean and participants must be able to swim against any current during the dives.
- Whenever entering the water there is a small chance of the suit leaking. In this case cold water will enter the suit and the water will be in direct contact with the thermal under layers and skin.
- Participants change in our tour vans in potentially wet, windy and cold weather conditions. In winter, outside temperatures in Iceland may be far below the freezing point.
- Participants will wear a scuba unit weighing ca. 20 kg plus 6-12 kg of weights while walking to the entrance point and certain length back from the exit point.
- Participants will breathe air through a scuba diving regulator while their face is submerged in cold water. Length of a dive varies typically between 30-60minutes.

Physician's Impression

I find no medical conditions that I consider incompatible with the activity described above.

I am unable to recommend this individual for the activity described above.
